

# Crystal Parks and Recreation Improvements

**Rinks Closed-** A short skating season ended on the second weekend of February. Staff worked extremely hard to maintain ice conditions this season, but the fluctuating weather made things difficult.

**Re-Shape Bassett Creek Hill** – The dirt pile at Bassett Creek park has been removed and the Staff is working on re-shaping the hill. The final plan for that area of the park has not yet been determined.

**Playground Inspections & Expression Swings**– With the nicer weather staff has been able to get in some playground inspections. They have also installed expression swings at Bassett Creek and North Lions Park.

**Spring Clean-up** – With the unusual warm-up this past February staff has been able to get a jump on some spring cleaning. This includes tree trimming, brush clean-up and cleaning of landscaping pots.

**Crystal Community** – There have been a few upgrades at the Crystal Community Center over the last month. New Dyson hand driers are being installed in the restrooms and we now have a bottle filling drinking fountain.
