

# Crystal Parks and Recreation Improvements

**Summer Recreation-** In preparation for the upcoming spring season we are getting parks ready to go. Tennis nets are going up at Becker Park, Lions Valley Place Park & North Lions Park. Ball fields will be prepared as well.

**Playground Woodchips-** The place surface around our playgrounds will be getting new engineered wood fiber. Using engineered wood fiber for playgrounds offers fall height protection and is ADA accessible.

**City Plantings-** Planting beds and pots are being prepared for spring planting. This year street scape planting will be more pollinator friendly, and drought resistant. Arbor day will also feature more pollinator friendly trees as giveaways.

**New Roof on Pool Building-** The roof on the Crystal Cove Aquatic Center building is being replaced before the 2017 pool season. Once the roof is finished new solar panels will be added back to the top of the roof.
