

Crystal Parks and Recreation Improvements

Athletic Areas – The athletic areas used throughout most seasons are being prepared for winter. Tennis nets are being removed, bases are being put away, and irrigation is being winterized. This includes the new soccer field at Skyway Park.

Cyclocross Racing– We will be hosting two cyclocross races in our parks during the month of November. This off-road bike race will be at Lions valley Place November 4-5 and Bassett Creek Park on November 18-19. Spectators are free.

Broadway Park Building – The building at Broadway Park has been removed. This was the first step in making the park more inviting. The area will be graded, seeded and turned into green space. Future improvements will be considered.

Tree Planting – Trees will be replanted in boulevards throughout the city. The property owner will choose one of 18 approved trees, not including ash or maple. The goal is to have no more than 5% of the same tree species citywide.
