

CITY of CRYSTAL

Project Summary – January 2018

Warming houses opened on December 22 at Welcome Park and Valley Place Park. Rinks will continue to be flooded and maintained as long as weather permits.

In preparation for the work being done at MAC Park this winter/spring, City Staff will be removing sections of the boardwalk that are being replaced.

When the City gets snow, parks staff become part of the Crystal snow removal team. Everyone helps in keeping Crystal drivable and walkable.

Maintenance items, like refinishing the footboards on bleachers, will be happening at the Crystal Community Center.
