

# CITY of CRYSTAL

## Project Summary – February 2018

The parks department are adding a new lawnmower, bobcat & John Deere tractor to their fleet in 2018. This equipment will be helpful for the projects they will be working on.

The work on the MAC park boardwalk has begun, and the first step was the removal of the old boardwalk sections. Some sections will be salvaged for future improvements.

The shore of the stormwater pond at North Lions Park is being cleaned up. This is done to remove invasive plants and volunteer trees that come in with high water levels.

February marks the end of the skating season. Warming houses will remain open until February 19 (weather permitting). Rinks will be maintained as long as weather permits.
