

Crystal Parks and Recreation Improvements

Lions Valley Park – The tennis courts at this park will be resurfaced in late September. The courts will be closed for this process, but will re-open with an improved playing surface by early October!

Yunkers Park – The warming house was replaced with a beautiful park shelter; perfect for small picnic gatherings or getting out of the sun. Seeding has taken place, so now it's time for the grass to grow!

Bassett Creek Park – A grant from the Minnesota Twins will help make needed improvements to this park's baseball field. The improvements will begin in the coming weeks, with completion in late October.

Welcome Park – A new soccer field, complete with irrigation, will be installed near the warming house this fall. Seeding will be done this fall and next spring, with the field being open for use next summer.

Regional Trail – Three Rivers Park District will be constructing a new regional trail this fall though a portion of Crystal. The trail will make great connections through our community and is planned for completion by winter.
