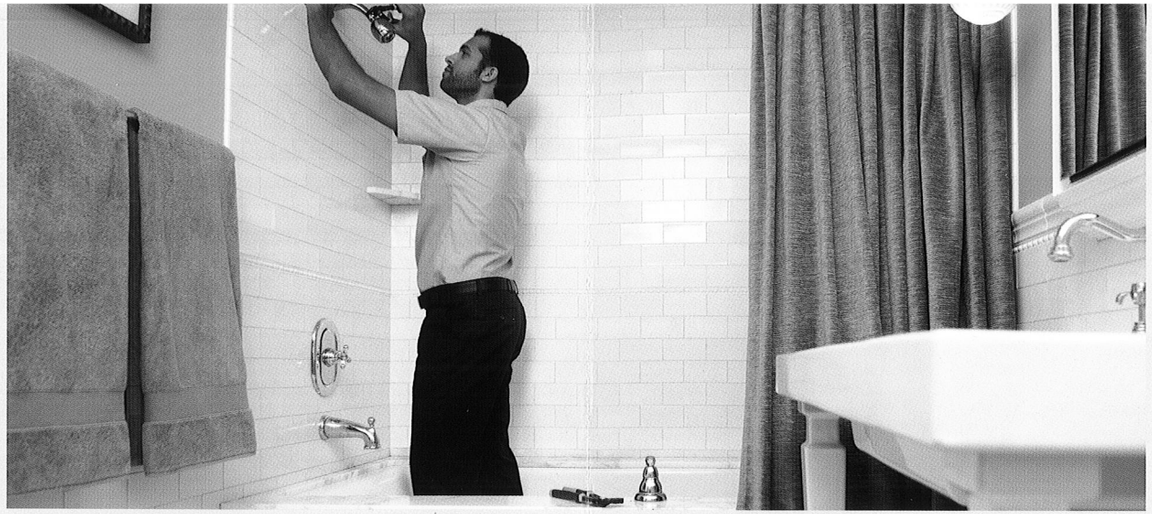
# ENERGY SAVINGS CUSTOMIZED FOR YOUR HOME.

Consultation, materials and labor included for only $70.

HOME ENERGY SQUAD®

Xcel Energy® CenterPoint Energy

## Sure, you want your home to be more energy efficient but it's hard to know where to start and what to do.



## Home Energy Squad

We'll visit your home and offer simple, custom solutions to help you save energy and money...from adding CFLs and weather stripping to installing a programmable thermostat.

In one convenient visit, you'll save up to hundreds of dollars on your energy bills—for a single fee and in two hours or less.

When we're done your home will be more efficient, comfortable and you will see the savings on your bill.

## Energy-Efficient Solutions

The Home Energy Squad will help you choose from the following items to improve your home's efficiency:

- Compact fluorescent lights (CFLs)—standard and decorative
- Programmable thermostat
- Weather stripping for two exterior doors
- High-efficiency showerhead
- Kitchen and bathroom faucet aerators
- Water heater temperature assessment and adjustment
- Water heater insulation
- Refrigerator thermometer

## Additional Solutions Available

You have the option to individually purchase additional quantities of the above energy-efficient solutions and the items listed below:

- LED bulbs
- Electronic/TV Peripheral timer
- Second programmable thermostat

## Small Changes Generate Big Savings

Heating and cooling your home can equal at least 50% of your energy usage annually, so why not install a programmable thermostat? You can save up to $180 every year in energy costs.

Installing CFLs is an easy way to save on your energy bills. Ten bulbs can save you up to $50 annually, plus they last 10 times longer and use up to 75% less energy than incandescent bulbs.

For as little as $70, your investment in a Home Energy Squad visit could be paid for within one year as a result of your energy savings.

## Get started today by calling 866-222-4595 or visiting HomeEnergySquad.net*
